COURSE CODE	ITE1002
COURSE NAME	WEB TECHNOLOGIES
SLOT	L-11+L-12
FACULTY	Prof. MARY MEKALA

## Q.1

Create a page aboutme.html that describes you. Include information such as:

- i) Your name in the top of the page in large text and your address in smaller text
- ii) A description of you in <= 2 sentences. Emphasize important word(s) in bold.
- iii) A list of classes you are taking right now with a simple description of each with interesting subjects in marvellous colours.
- iv) Your 3 favourite movies, books, or TV shows, in order. Make at least one link to an interesting site about that TV show/movie/book
- v) Two images that represent you when you're happy and sad.
- vi) Something about one of your neighbours (people sitting next to you, make it interesting as well.
- vii) Describe your skill level in programming languages

### HTML CODE:

```
<html>
<head>
<title> About me </title>
</head>
<body bgcolor="#E5E4E2">
<h2 align=center><u>Priyal Bhardwaj</u></h2>
<h3 align=center><u>Bhilai, Chhattisgarh</u></h3>
<font size="4" face="Times New Roman" color="green">
I'm pursuing <b>B.Tech - IT</b> in <b>VIT, Vellore</b>.
<br>
I love to listen to<b> K-POP</b> and <b>BTS </b> is my favourite Korean band.
</font>
<h2 align=center><u>List of classes</u></h2>
<ul>
<li><b>Problem Solving and Object Oriented Programming</b>
<ul>
<li> This is a problem solving course in which object oriented methods are used
to design computerized solutions to information systems problems.</li>
</ul></li>
</ul>
<ul>
<li><b>English for Engineers</b>
<ul>
<li> The course covers all the areas of grammar necessary for the
undergraduate students of engineering</li>
```

</ul></li></ul>

<ul>

<li><b>Web Technologies</b>

<ul>

<li> A Front-End Technology used for Front-End Development. It includes HTML, CSS and Javascript</li>

</ul></li></ul>

<ul>

<li><b>Applications of Differential and Difference Equations</b>

<ul>

<li> A branch of mathematics that deals with how efficiently problems can be solved using calculus, differentiation and integration can help us solve many types of real-world problems.</li>

</ul></li></ul>

<ul>

<li><b>Digital Logic and Microprocessor</b>

<ul>

<li> How to design digital logic circuits, specifically combinational and sequential circuits</li>

</ul></li></ul>

<ul>

<li><b>Statistics for Engineers</b>

<ul>

<li>Engineering statistics combines engineering and statistics using scientific methods for analyzing data</li>

</ul></li></ul>

<ul>

<li><b>Engineering Physics</b>

<ul>

<li>The study of the combined disciplines of physics, mathematics and engineering, particularly computer, nuclear, electrical, electronic, materials or mechanical engineering</li>

</html>

## OUTPUT SCREEN:

## **Q.2**

Create a stylesheet named styleme.css to improve the appearance of your About Me page.

- i) Change the color of at least two elements
- ii) Change the font properties (family, size, weight, or style) of at least two elements.  
Some standard fonts: Arial, Arial Black, Verdana, Trebuchet MS, Georgia, Tahoma, Courier New, Times New Roman
- iii) Change the background color, text alignment and borders

### **CSS CODE:**

```
#p1
{
    color:Green;
}
h1
{
    color:#E33A3A;
    font-family:Georgia;
    border-style:double solid double solid;
    border-color:Maroon;
    border-width:5px;
    border-radius:10px;
}
#p2
{
    color:Purple;
    font-style:Oblique;
}
.subheads
{
    font-size:20px;
}
.main1
{
    color:Red;
    font-weight:900;
}
dt
{
    font-weight:800;
```

```

}
body
{
    background-color:lightblue;
}
#address
{
    text-align:right;
}

```

### Q.3

Pick 5 corporations and hunt down their current stock prices.

- i) Place them in a neatly arranged table with their name, symbol, last price, 52wk high, 52wk low and PE ratio.
- ii) The end result should look like the following. Notice that the first column is aligned left and the rest are centered.
- iii) Now alter the last table using shaded rows and no border.

<i>My tech stock picks</i>					
NAME	SYMBOL	CURRENT	52WK HI	52WK LO	P/E RATIO
Microsoft	MSFT	86-3/8	119-15/16	75-1/2	56.09
Cisco Systems	CSCO	72-1/8	82	24-13/16	400.69
America Online	AOL	63	95-13/16	38-15/32	350.00

#### Q.4

Write the HTML and CSS code necessary to recreate the following appearance onscreen, between but not including the thick black lines. (No manual line breaks have been inserted into the text.) Assume that the code you're writing will be placed inside the body of the page.

Some details about the desired appearance:

- i) All text uses default sizes and font families.
- ii) The central section of dialogue is centered within the page and occupies 50% of the page width.
- iii) The image of Vader at right comes from the file vader.png, which you should set to 20% of the page width.
- iv) There are no margins or padding separating any text.

#### HTML CODE:

```
<!doctype html>
<html>
<head>
<meta charset="utf-8">
<title>Q4</title>
<style>
mark{
    background-color:#fff;
    color:red;

### **Q.1**

A mail-order house sells five different products whose retail prices are as follows: product 1, \$2.98; product 2, \$4.50; product 3, \$9.98; product 4, \$4.49; and product 5, \$6.87. Write a script that reads a series of pairs of numbers as follows:

1. Product number 2. Quantity sold for one day

Your program should use a switch statement to determine each product's retail price and should calculate and output HTML that displays the total retail value of all the products sold last week. Use a prompt dialog to obtain the product number and quantity from the user. Use a sentinel-controlled loop to determine when the program should stop looping and display the final results. If the user inputs an invalid product number a proper alert window shall be displayed.

### **HTML CODE:**

```

## OUTPUT SCREEN

## Q.2

Create a web page containing three divisions.

- i) The first division displays a digital clock on the rightmost end.
- ii) The width of the first division is 100%.The second division and third division lay side by side.
- iii) The second division has an image slider and third division has a color picker and two list box having font-family and size and a button. When a button is clicked the background color, font and font size should change for a whole page. Use JavaScript to implement the above.

### HTML CODE:

### OUTPUT SCREEN:

### **Q.3**

Design a student registration form which takes student name, register number, DOB, program, email id, temporary address, permanent address, phone number. Validate the following using JavaScript:

- i) Mobile number should be exactly 10 digits.
- ii) Register number should have alphabets and numbers only
- iii) Name should not exceed 30 characters and can be only alphabets.
- iv) Email validation
- v) Provide a checkbox saying "Permanent address is same as temporary address". If checked, the value of permanent address should be added automatically from temp address. And should be in disabled mode.

### **HTML CODE:**

```
<!doctype html>
<html>
<head>
<meta charset="UTF-8">
<title>Q3</title>
<script type="text/javascript">
function validate(){
    var formm=document.getElementById("registration");
    var name=formm.name.value;
    var registerno=formm.registerno.value;
```

```

var dob=formm.date.value;
var program=formm.program.value;
var emailid=formm.emailid.value;
var tempadd=formm.tempadd.value;
var peradd=formm.peradd;
var phoneno=formm.phoneno.value;
var check=formm.pemadd;
if(name==" " || name.length>30){
    alert("invalid name");
return false;
}
if(tempadd==""){
    alert("please provide temporary address");
    return false;
}
if(check.checked==true){
    peradd.value=tempadd;
}
if( /^[^a-zA-Z0-9]/.test( registerno) || registerno=="") {
    alert('Invalid Register no');
    return false;
}
if(dob==""){
    alert("Please provide DOB");
    return false;
}
var atpos = emailid.indexOf("@");
var dotpos = emailid.lastIndexOf(".");
if (atpos<1 || dotpos<atpos+2 || dotpos+2>=emailid.length) {
    alert("Not a valid e-mail address");
return false;
}
if(program==""){
    alert("Program Field cannot be empty");
    return false;
}
if(phoneno.length!=10 || isNaN(phoneno)){
    alert("Phone number is invalid");
    return false;
}

```

```

    }
</script>
<style>

### Q.4

BSNL has designed a grievance registration form in HTML with name of customer, address, telecom circle, email and grievance nature in a list box containing huge bills for limited mobile usage, roaming charges and frequent service disruption and a submit button. Write a Javascript DOM event to be enabled when the user submits the form and display the complaint details in a tabular format. If no grievance is selected, then invoke another DOM event to display “No grievances”.

### HTML CODE:

```
<!doctype html>
<html>
<head>
<meta charset="UTF-8">
<title>Q4</title>
<style>
#ftable{
border: 2px solid black;
border-collapse: collapse;
margin:0 auto;
width:400px;
}
td{
border: 1px solid black;
padding:8px;
```

```

}
.addr{
width: 200px;
}
#table2{
border: 2px solid black;
border-collapse: collapse;
margin:20px auto;
width:400px;
}
th{
border: 1px solid black;
padding:8px;
}
</style>
</head>
<body>
<form id="bsnl" action="">
<table id="ftable">
  <tr>
    <td>Name of customer</td>
    <td><input type="text" class="addr" name="name" required></td>
  </tr>
  <tr>
    <td>Address</td>
    <td><textarea rows="10" cols="20" class="addr" name="address"
placeholder="Your address"></textarea></td>
  </tr>
  <tr>
    <td>Telecom circle</td>
    <td><input type="text" class="addr" name="telcircle"></td>
  </tr>
  <tr>
    <td>Email</td>
    <td><input type="email" class="addr" name="telcircle"></td>
  </tr>
  <tr>
    <td>Choose Complaint</td>
    <td><select class="addr" name="grievances">
      <option value="no Grievances" selected>No complaint</option>

```

```

        <option value="Huge Bills for Limited Usage">Huge Bills for Limited
Usage</option>
        <option value="roaming charges">Roaming charges</option>
        <option value="frequent service disruption">Frequent service
disruption</option>
    </select></td>
</tr>
<tr>
    <td colspan="2"><input type="button" value="Submit"
onclick="details()"></td>
</tr>
</table>
</form>
<table id="table2">
    <tr>
        <th>Name of customer</th>
        <th>Address of customer</th>
        <th>Telecom circle of customer</th>
        <th>Email</th>
        <th>Grievances</th>
    </tr>
    <tr>
        <td id="nme"></td>
        <td id="add"></td>
        <td id="telcir"></td>
        <td id="email"></td>
        <td id="griv"></td>
    </tr>
</table>
<script type="text/javascript">
// function displaydet(){
// var name=document.getElementById("bsnl").elements[0].value;
// console.log(name)
function details(){
    var cform=document.getElementById("bsnl");
    var name=cform.elements[0].value;
    var address=cform.elements[1].value;
    var telecomcircle=cform.elements[2].value;
    var email=cform.elements[3].value;
    var dlist=cform.elements["grievances"];

```

```

if(dlist.selectedIndex==0){
    alert("No grievances selected");
}
else{
    document.getElementById("nme").innerHTML=name;
    document.getElementById("add").innerHTML=address;
    document.getElementById("telcir").innerHTML=telecomcircle;
    document.getElementById("email").innerHTML=email;

    document.getElementById("griv").innerHTML=dlist.options[dlist.selectedIndex].value;
}
}
</script>
</body>
</html>

```

### OUTPUT SCREEN:

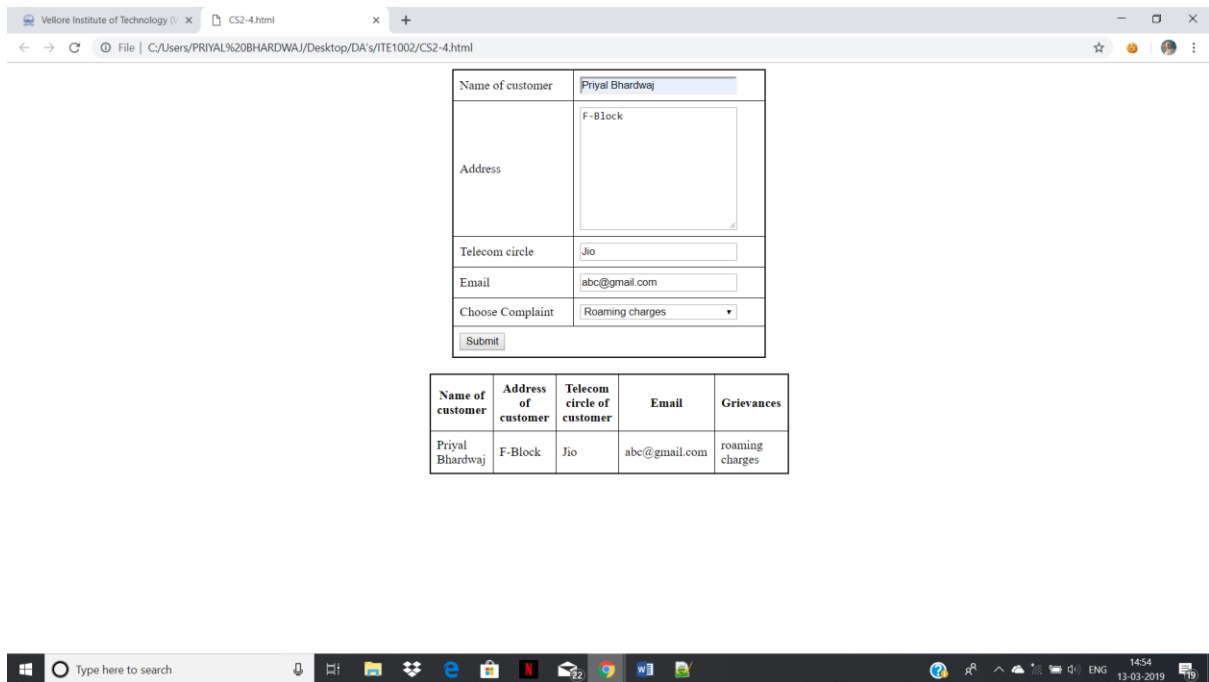

The screenshot shows a web browser window with a single tab titled 'Vellore Institute of Technology'. The address bar shows the file path 'C:/Users/PRİYAL%20BHARDWAJ/Desktop/DA's/ITE1002/CS2-4.html'. The main content area displays a form with the following fields:

- Name of customer:
- Address:
- Telecom circle:
- Email:
- Choose Complaint:
- Submit:

Below the form is a table with the following structure:

Name of customer	Address of customer	Telecom circle of customer	Email	Grievances

The Windows taskbar at the bottom shows the search bar, task view, and several application icons. The system clock indicates the time is 14:53 on 13-03-2019.

## Q.5

Develop an online Railway Reservation application.

- It has top frame with the name "Online Railway Reservation System" in the middle, there is a logo/image in the left corner using suitable CSS styles and the left frame with the links for Ticket booking and availability checking; for each link the target should be the right frame.
- Create a Ticket Booking form which should have From and To in a text box, Train Names in a drop down box, Coach Number in a list box, Date in a date field, Timing in a text box, Passengers Male and female in a dropdown menu showing the count number and Submit and Reset button.
- Assume availability of tickets already declared in the script. Create a DOM event to display the ticket confirmation details on any HTML element when ticket is available otherwise display "tickets not available" by invoking any other DOM event.

NAME	PRIYAL BHARDWAJ
REG. NO.	18BIT0272
COURSE CODE	ITE1002
COURSE NAME	WEB TECHNOLOGIES
SLOT	L-11+L-12
FACULTY	Prof. MARY MEKALA

## Q.1

### JQuery

- i) Design a table in the format given below using HTML and jquery selectors.
- ii) Apply different background for odd and even rows of the table.
- iii) Apply different CSS for table header using jquery selectors.

First Name	Last Name	City	State
Mannix	Bolton	Merizo	Michigan
Suki	King	Fairmont	Oklahoma
Shelby	English	Durham	Arkansas
Portia	Burns	Princeton	Rhode Island
Dacey	Young	Covina	South Carolina
Clark	Reyes	Grand Rapids	New Jersey
Maris	Decker	Sierra Madre	Georgia

### HTML CODE:

```
<!doctype html>
<html>
<head>
<meta charset="utf-8">
<title>Q1</title>
<script src="jquery-3.3.1.min.js"></script>
<script>
    $(document).ready(function(){
        $("tr:odd").css("background-color","#848482");
        $("tr:odd").css("color","white");
    }
);
</script>
</head>
<body>
<table border="2px" bordercolor="transparent" width="100%" height="50%">
    <tr align='center'>
        <th>First Name</th>
        <th>Last Name</th>
        <th colspan="2">City</th>
        <th colspan="2">State</th>
    </tr>
    <tr>
        <td>Mannix</td>
        <td>Bolton</td>
```

		<td colspan="2">Merizo</td>	
		<td colspan="2">Michigan</td>	
		</tr>	
		<tr>	
		<td>Suki</td>	
		<td>King</td>	
		<td colspan="2">Fairmont</td>	
		<td colspan="2">Oklahoma</td>	
		</tr>	
		<tr>	
		<td>Shelby</td>	
		<td>English</td>	
		<td colspan="2">Durham</td>	
		<td colspan="2">Arkansas</td>	
		</tr>	
		<tr>	
		<td>Portia</td>	
		<td>Burns</td>	
		<td colspan="2">Princeton</td>	
		<td colspan="2">Rhode Island</td>	
		</tr>	
		<tr>	
		<td>Dacey</td>	
		<td>Young</td>	
		<td colspan="2">Covina</td>	
		<td colspan="2">South Carolina</td>	
		</tr>	
		<tr>	
		<td>Portia</td>	
		<td>Burns</td>	
		<td colspan="2">Princeton</td>	
		<td colspan="2">Rhode Island</td>	
		</tr>	
		<tr>	
		<td>Suki</td>	
		<td>King</td>	
		<td colspan="2">Fairmont</td>	
		<td colspan="2">Oklahoma</td>	
		</tr>	

</table>

```
</body>
</html>
```

**OUTPUT SCREEN:**

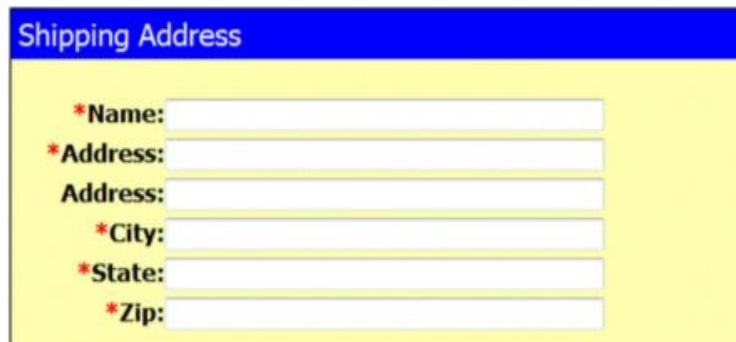

First Name	Last Name	City	State
Mannix	Bolton	Merizo	Michigan
Suki	King	Fairmont	Oklahoma
Shelby	English	Durham	Arkansas
Portia	Burns	Princeton	Rhode Island
Dacey	Young	Covina	South Carolina
Portia	Burns	Princeton	Rhode Island
Suki	King	Fairmont	Oklahoma

## Q.2

### Angular JS

- i) Create a shipping address form using html in the format given below.
- ii) Write an angular script that will be invoked when form is validated successfully.
- iii) Display the status messages using angular directives and angular class values for all form elements.

\* Required

Note: If the required fields are not filled with data, an alert should be thrown.

### HTML CODE:

```
<html>
<head>
  <meta charset="utf-8">
  <title>Q2</title>
  <script src="angular.min.js"></script>
  <style>
    div{
      border: 1px solid blue;
    }
    input.ng-invalid
    {
      background-color:red;
    }
    input.ng-valid
    {
      background-color:lightgreen;
    }
  </style>
</head>
<body ng-app="">
  <form name="myform">
```

```

<div style="width:30.55%;background-
color:blue;color:white;height:4%"><b>Shipping Address</b></div>
<div style="width:30%;background-color:#FFE5B4;padding:4px">
<p>
  &nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;<font
color="red">*</font><b>Name</b>:<input type="text" name="myname" ng-
model="myname" ng-pattern="/^[a-zA-Z]{3,30}$/" required>
  <span style="color:red" ng-show="myform.myname.$touched &&
myform.myname.$error.required">The name is required.</span>
</p>
<p>
  <font color="red">*</font><b>Address</b>:<input type="text"
name="myAddress" ng-model="myAddress" ngminlength="10" ng-
maxlength="30" ng-required="true">

### Q.3

- Create an angular shopping application to buy books and remove if not required.
- If the user enters a book in the text box and clicks addbook button, the book is added and if the user clicks on cross symbol next to each book given in the picture below, the book is removed from the list.
- If the book is selected twice, display an appropriate error message. Use angular animations to add and remove items.

#### **Books**

Web Technologies	X
Operating System	X
Database systems	X
Computer Architecture	X

ADD BOOK

#### **HTML CODE:**

```
<!doctype html>
<html>
  <head>
    <meta charset="utf-8">
    <title>Q3</title>
    <script src="angular.min.js"></script>
```

```

        <link rel="stylesheet"
href="https://www.w3schools.com/w3css/4/w3.css">
    </head>
    <body ng-app="myShoppingList" ng-controller="myCtrl">
        <script>
            var app = angular.module("myShoppingList", []);
            app.controller("myCtrl", function($scope) {
                $scope.products = ["Web Technologies","Operating
Systems","Database Systems","Computer Architecture"];
                $scope.addItem = function(){
                    $scope.errortext = "";
                    if(!$scope.addMe){
                        return;
                    }
                    if($scope.products.indexOf($scope.addMe) == -1){
                        $scope.products.push($scope.addMe);
                    }
                    else {
                        $scope.errortext = "The item is already in your shopping
list.";
                    }
                }
                $scope.removeItem = function(x){
                    $scope.errortext = "";
                    $scope.products.splice(x, 1);

</div>
</div>
</body>
</html>

```

## OUTPUT SCREEN:

#### Q.4

- i) Create an angular routing application that displays the default page as the order details page containing three orders as shown below.
- ii) When the “show details” is clicked for a particular order, the order details of particular order number must be displayed below.

#	Order No.	Details	
1	1234	15" Samsung Laptop	<a href="#">show details</a>
2	5412	2TB Seagate Hard drive	<a href="#">show details</a>
3	9874	D-link router	<a href="#">show details</a>

ORDER #9874

HERE ARE THE DETAILS FOR ORDER #9874.

## OUTPUT SCREEN:

The screenshot shows a web browser displaying an AngularJS application. The application has a table with the following data:

#	Order No.	Details
1	1234	15"Samsung Laptop
2	5412	2TB Seagate Hard drive
3	9874	D-link router

Below the table, there is a section titled "Order Details" which is currently empty. The browser's developer tools are open, showing the HTML structure of the application. The HTML includes a table with the following structure:

```

<table style="width:100%; border="1" bordercolor="transparent" cellpadding="4px">
  <tr bgcolor="#010000">
    <th align="left"><b>Order No.</b></th>
    <th align="left"><b>Details</b></th>
  </tr>
  <tr>
    <td align="left">1</td>
    <td align="left">15"Samsung Laptop</td>
  </tr>
  <tr>
    <td align="left">2</td>
    <td align="left">2TB Seagate Hard drive</td>
  </tr>
  <tr>
    <td align="left">3</td>
    <td align="left">D-link router</td>
  </tr>
</table>

```
